Recent Projects

What's New w/ Eastside A/V

The biggest changes for Eastside A/V these past 6 months have been a rapid growth in new customers thanks to all of you, and for those of you who are not aware, the second big change is that I am going back to school. Starting this fall, I am part of University of Washington's Evening MBA program.

Its been a busy and exciting few months, and I look forward to the up coming holiday season and taking care of your Audio, Video and Home Theater needs. To help with this, we have brought on a number of new vendors, lines, and innovative products from companies such as Boston Accoustics, Marantz, Escient 'Fireball', and Netstreams 'distributed Audio/Video and Home automation' products.

New updates to EastsideAV.Com

- Our Gallery Section has been updated to include photos of some of our recent projects.
- New Articles on SED technology, and other informative aspects.
